

The intelligent GÜNTHER solution

Industry:	Automotive
Part description:	Cover
Material type:	PA 6.6 GF 35
Articel weight:	161 g per nozzle
Task:	Accuracy in dimensioning and surface finish.
Challange:	Narrow installation conditions inside the mould. Ejector assembly on nozzle side. The processing of fibreglass-filled material requires protection against wear in the hot runner system e.g. nozzles with hard metal tip.

The intelligent **GÜNTHER** solution:

2-fold hot runner system with 8SHT300H nozzles. Optimised temperature control and thermal isolation of mould and hot runner system through nozzles with insulated shaft, such as ...HT type.
