The intelligent GÜNTHER solution

Industry:	Sport
Part description:	Ski binding
Material type:	PA6 and Delrin
Articel weight:	10 g
Task:	Accuracy in dimensioning and surface finish.
Challenge:	Material saving through gas injection technology, no thermal damage to material as component is subject to a high degree of mechanical stress.

The intelligent **GÜNTHER** solution:

Gas injection technology with closing gate (GaNaSys method)
10NHT80 nozzle (among others).
